Dear Mr. Altur:

Please find enclosed a copy of the revisions for the Interlake Property WMI screening site inspection (SSI), ILD 000810432. These revisions have addressed all the comments contained within the letter received on April 24, 1990. Please replace the following pages into the report: Pages 1-1 through 2-3, pages 3-1 through 3-5, pages 4-1 through 4-9 pages 5-1 through 5-4, page 6-1 and the first two pages of form 2070-13.

The hazardous waste quantity is based on the once filled capacity of the lagoons described in the September 26, 1980 USEPA Memo on Interlake Steel. A lagoon sample was found to contain PCB's and a xylene isomer.

Because of the uncertainty as to where the closest well is located (either 3/4 or 1 3/4 mile from the site) the score for PRO assumes the former.

Should you have any questions or additional comments concerning the enclosed documents, please feel free to call Tim Murphy at 217/782-6760.

Sincerely,

Thomas Crause
Pre-Remedial Program Manager
State Site Management Unit
Remedial Project Management Section
